

## Design Validation – Team Page & Login Restyling

**Reviewer:** Riley Pittard

**Date:** 13 August 2026

The supplied mockups were reviewed against the Team Page and Login Restyling requirements. The required Team Page fields are represented, and the login design is accepted given that implementation remains styling-only and does not change existing authentication behaviour. Some documented edge cases are not explicitly shown in the mockups and in these cases, the existing requirements remain authoritative for implementation.

**Outcome:** Approved for implementation.
